

am i missing something? is our national securtiy at risk here? is the economy going to suffer or benefit? is american life going to suffer or benefit? please do the right thing in protecting the ever so weakening first amendment. the only reason the NAB challenges satellite radio is because their stranglehold on broadcasting is being challenged. competition breeds a better economy. The FCC has no place limiting satellite from broadcasting and if they do, then the archaic law/rule needs to be amended to better fit the times.

1st thing in the a.m., the uninterrupted traffic and weather report helps me save gas and time by providing me the knowledge i need to pick the best route to work.

Send a message to them that they are wasting their time issuing a petition of this nature by laughing at them. NAB members are threatened, and appealing to the federal gov't for help... there is only 1 reason... they stand to lose money.

as a consumer i should be afforded the choice. i still listen to FM and AM, but enjoy the choice of XM. To remove my choice, is to remove my rights... please, don't do it.

while i spend my work day developing systems to protect our way of life, these liberals try to undermine it all. this bill shouldn't even be accepted for review in my opinion.

vote "no" on HR 4026.
